DETAILED ACTION

Allowable Subject Matter

Claims 51, 55-64, 74, 78-87, 97, 101-110, 120, and 124-133 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As for claims 51, 55, 74, 78, 97, 101, 120, and 124, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a tunable optical band pass device, in combination with the rest of the limitations of the above claims.

Regarding the above claims, the arguments of record in the Appeal Brief filed March 14, 2005 lay out detailed reasoning for the allowability of the claims in view of the prior art. In particular, however, the prior art of record does disclose the individual parts of the invention, be it the substrates or the optical medium with a tunable refractive index. However, these individual elements or groups of elements cannot be obviously combined with one another to create the invention claimed in the instant application, particularly the use of a displacement transducer that measures the changes in the spacing between the inner surfaces of the substrates in conjunction with an adjustable spacer that physically adjusts this spacing, the transducer tied into a controller for monitoring the tunable operation of the interferometer via use of the input signal from the transducer, in combination with the rest of the limitations of the above claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
